

Concrete solutions for architects, engineers and contractors

VEXCON
CHEMICALS, INC.

Complete Concrete Protection

Cure & Seals • Penetrating Sealers • Epoxy Coatings • Water & Stain Repellents
Vertical Waterproof Coatings • Liquid Floor Hardeners

Performance Construction Chemicals

Protecting and improving concrete since 1974

Vexcon produces a complete line of **extremely durable** and visually appealing protective coatings for a variety of interior and exterior concrete applications. Vexcon has been leader in producing **innovative products** to protect and improve concrete for decades. All products are **thoroughly tested** in the laboratory and field to ensure they meet and exceed industry performance standards. Vexcon's proprietary materials and technologies continue to produce the best in **premium concrete protection**.

Concrete Performance, Protection and Added Value

Cure & Seals

Penetrating Sealers

Epoxy Coatings

Water & Stain Repellents

Vertical Waterproof Coatings

Liquid Floor Hardeners

Certi-Vex AC line:
25, 30%, 1315, 1315HG, 1315 Concrete Stain, 1315 Beading Flat, 1315 Super Gloss, Guard Clear and Guard CACS

Starseal line:
309, 800, 30%, 1315, 1500, 1315 Beading Flat and 1315 & Vertical Concrete Stain

Certi-Vex line:
Enviowater Proof 100 & 500, Guard Clear, Guard CACS, Gloss Sealer FT and Penseal 244 40%

Powerseal line:
20% and 40%

PowerCoat line:
PowerCoat Primer
PowerCoat Epoxy Decorative
PowerCoat One
PowerCoat Epoxy HD
PowerCoat Epoxy LD
PowerCoat Epoxy UV+
PowerCoat U 1500

Repellents:
Stain Repellent,
Penseal 244 40%,
Enviowater Proof 100 & 500,
Powerseal 20% and 40%

Certi-Vex Envio line:
Texture/Smooth,
Masonry Paint,
Stain Blocker,
Bridge and Block Fill

Floor Hardeners:
Starseal PS Clear,
Starseal PS Clear FSR
and Enviohardener 204

Cure & Seals

Protect, improve, beautify and seal concrete surfaces

Vexcon offers the widest selection of crystal-clear and colored concrete cure and seals for a variety of new and existing concrete surfaces. Starseal® and Certi-Vex® cure and seals are easy-to-use, non-yellowing* and penetrate quickly to form a hard coating that is wear, chemical and stain resistant. They prevent efflorescence and improve the strength of new concrete. Featuring Vexcon's breathable technology, our sealers allow moisture vapor to pass through rather than becoming trapped to prevent whitening, peeling and flaking. Protect, improve and beautify concrete with Vexcon's cure and seals.

Penetrating Sealers

Protect concrete surfaces with our clear or colored, deep-penetrating sealers

Vexcon's deep penetrating, breathable silane sealers and one-step curing acrylic/silane sealers provide the maximum protection from harmful chemicals, salts, water and UV light. Our one-step acrylic/silane sealers enhance surface appearance with a glossy clear or decorative color coating. Silane sealers provide an invisible barrier of protection without changing the natural surface appearance of concrete. These products are cost effective and easily applied to new or existing, vertical or horizontal concrete and masonry surfaces.

Epoxy Coatings

Extremely durable, functional and decorative concrete coatings

Vexcon produces a complete line of technologically-advanced, high-performance non-slip epoxy coatings. The PowerCoat® family of unique breathable epoxy coatings are the result of over thirty years of chemical engineering innovation. Our water-based and solvent-based products address environmental and installation concerns while maintaining exceptional performance and value for a wide range of interior and exterior, new and existing concrete applications. Vexcon's proprietary materials and technologies continue to produce the best in premium concrete protection for today's demanding requirements.

Water & Stain Repellents

A deep-penetrating invisible barrier of protection

Vexcon's breathable, highly reactive silane-based water repellents extend the life of concrete and masonry structures. Without changing the natural appearance or texture, these products penetrate deep into vertical and horizontal substrates. They provide maximum protection against the costly damaging affects of mildew, erosion from water, salts, deicing chemicals, corrosion and spalling.

Vertical Waterproof Coatings

Decorative coatings to waterproof and protect new or existing surfaces

Certi-Vex® high-build acrylic coatings offer superior performance with easy application. With excellent adhesion and flexibility, they offer long-term resistance to driving rains, UV light, molds, and fungus. Featuring an easy one-coat application over new or existing concrete and masonry surfaces, these coatings are guaranteed to not blister, crack, peel or stain. Available in three textures; fine, medium and coarse, in 15 standard and custom colors.

Liquid Floor Hardeners

Harden and densify gray and decorative floors for superior wear and stain resistance

Vexcon's liquid floor hardeners provide long-term protection against wear and staining. These deep penetrating hardeners are easy and quick to apply to gray or colored concrete floors. They are chemical resistant, water-repellent and offer optional resistance to food stains such as vinegar, milk and citric acids. These products quickly form a low-sheen or glossy surface requiring no topical coatings to produce a low-maintenance, cost-effective, lifetime floor.

vexcon.com

Vexcon products meet the toughest current environmental and performance standards in the market today. All Vexcon products comply with federal EPA and state VOC regulations as well as numerous industry standards and specifications. Consult specific product data sheet for more information. *Non yellowing per ASTM C-1315. Consult specific product data sheet for more information.
