PowerCoat® Epoxy, MoistureBloc® and Certi-Vex® Acrylic Coatings

# Moisture Control

■ Floor Covering ■ Epoxy Coatings ■ Masonry

Vexcon offers a wide range of product solutions designed to control moisture from concrete and masonry surfaces.

If moisture in your floor or walls has you concerned, we've got you covered.

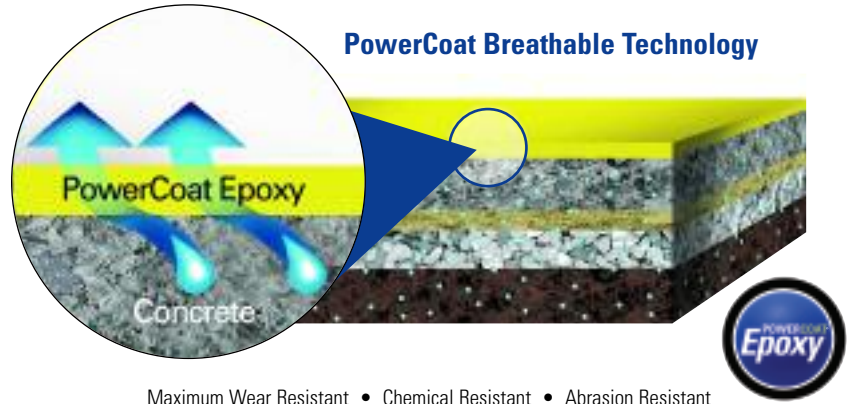

Vexcon offers a complete line of products to help architects, engineers and contractors take control of moisture. Suitable for interior and exterior applications on vertical and horizontal surfaces, these products are guaranteed to waterproof and reduce moisture vapor. With over a decade of proven performance, our industry-leading products will prevent the costly and harmful affects of moisture.

## PowerCoat® Epoxy Systems

### Eliminate epoxy failures due to moisture in concrete

Vexcon's PowerCoat Epoxy coatings produce extremely durable, functional, and decorative flooring surfaces. Our breathable epoxy coatings prevent the build-up of moisture in concrete eliminating common epoxy and urethane failures such as blistering, peeling and cracking. Vexcon epoxies also offer long-term wear, and maximum abrasion, impact and chemical resistance. Available in semi-gloss and gloss clear and 17 standard colors.

- Guaranteed performance in the presence of moisture vapor
- USDA approved
- Non-slip surface
- Interior and exterior applications
- Apply to new or existing concrete
- Waterproofs

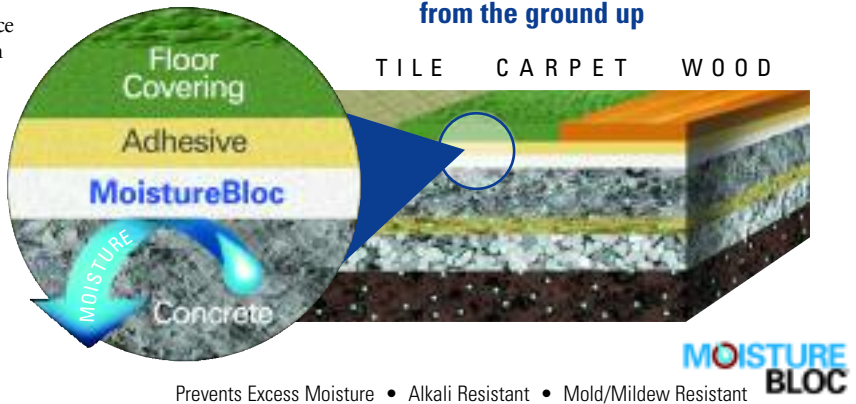

Maximum Wear Resistant • Chemical Resistant • Abrasion Resistant

## MoistureBloc® Vapor Reduction Systems

### Eliminate flooring failure due to moisture in concrete

Vexcon's MoistureBloc vapor reduction systems are guaranteed to reduce moisture vapor in concrete to three pounds or below. Moisture can come from ground water, atmospheric conditions, reoated floor cleaning or the concrete itself. When excess moisture is present in concrete, a common result is flooring adhesive failure. Wet adhesive can smell, ooze between tiles, sheet flooring can indent or pop out and carpeting can lift up. In some cases mold, mildew and floor lifting can cause health and safety issues. Vexcon offers a wide range of product solutions specifically designed to meet the particular requirements of any flooring installation. Don't wait for costly call backs and repairs, use MoistureBloc in all your flooring installations.

- Effective mold and mildew blocker
- Low per square foot cost
- Apply to all concrete surfaces
- Cures new concrete

Prevents Excess Moisture • Alkali Resistant • Mold/Mildew Resistant

## Certi-Vex® Acrylic Coatings

### Vertical coatings to waterproof and protect

Certi-Vex® waterproof high-build breathable acrylic coatings offer superior performance, excellent adhesion, flexibility and long term resistance to wind driven rain, UV light, molds and mildew. These waterproof coatings can be applied to new or existing, above or below grade concrete surfaces, masonry, block and stucco. Moisture resistance guarantees that the coating will not blister, peel, crack or stain. These coatings provide years of waterproof protection. Available in 15 standard and wide range of custom colors in fine, medium or coarse textures.

- Suitable for a broad range of applications
- Apply over alkaline surfaces and in the presence of hydrostatic pressure
- Apply to green concrete, no need to wait for curing before application
- Performance warranty
