## CERTI-SHINE CLEANING INSTRUCTIONS

**General Cleaning:** use a vacuum, broom or walk behind scrubber with water) on a daily basis as needed. Spills should be cleaned when they occur.

**Maintenance Cleaning:** when a more thorough Cleaning is desired:

1. Spills should be cleaned when they occur.
2. Heavily soiled areas should be spot cleaned prior to the overall area being cleaned.
3. Use a mop (making sure it is clean and that a clean mop bucket is used each time) add Vexcon Certi-Vex Super Degreaser & Cleaner or Neutral or Basic floor cleaner to the Mop water as directed in manufacturers instructions.
- OR
4. Use a walk behind or ride on scrubber make sure that the brushes and or pads are clean and not aggressive. The scrubber should be clean including the: a) clean water tank b) dirty water tank c) blade of the squeegee. ) Add Vexcon Certi-Vex Super Degreaser & Cleaner or a Neutral or Basic floor cleaner to the water as directed in manufacturers instructions. By using clean equipment each time, you will maintain a clean floor.
5. Whether you choose 3 or 4 the most important process is the rinsing of the floor after the cleaning is completed. Use clean water and a clean Mop head or brush to thoroughly rinse the floor. Leave no puddles behind.
6. If a specific area needs additional cleaning use the Super Degreaser & Cleaner straight. scrub with a Nylon bristle brush. Let sit 5 minutes. Scrub one more time and then rinse with warm water.
7. If desired a buffing or burnishing can be done with a Hogs hair pad. (This is not necessary but can increase shine).
